

NPTEL Online Certification Course
Design & Implementation of Human-Computer Interfaces
Assignment 2: Detailed Solution
Indian Institute of Technology Guwahati

1. Contextual inquiry is also known as _____.

- a. Interview
- b. Observation
- c. Semi-structured interview

Ans: Semi-structured interview

2. In SRS, functions are not represented as

- a. Function name
- b. Input
- c. Output
- d. Description
- e. Motivation

Ans: Motivation

3. Contextual inquiry can be done in _____ and passive mode.

- a. active
- b. semi-active
- c. neutral

Ans: active

4. There are _____ stages in contextual inquiry.

- a. two
- b. five
- c. six
- d. eight

Ans: five

5. Which stage in the Contextual Inquiry process involves arranging for recording observations and scripting the procedure?

- a. Plan Stage
- b. Initiate Stage
- c. Execute Stage
- d. Reflect Stage

Ans: Plan Stage

6. Affinity diagram method consists of _____ steps.

- a. Three
- b. Two
- c. Six
- d. Five

Ans: Five

Assignment 2: Detailed Solution
Indian Institute of Technology Guwahati

7. Usability requirements is one type of _____.

- a. Functional Requirement
- b. Non-functional requirement

Ans: Non-functional requirement

8. What is the primary objective of Contextual Inquiry?

- a. To watch and observe users perform tasks in their natural work setting
- b. To conduct semi-structured interviews with users
- c. To develop design recommendations
- d. To study user behavior using physical note-taking

Ans: To watch and observe users perform tasks in their natural work setting

9. What is the purpose of the "Reflect" stage in the Contextual Inquiry process?

- a. To contact the authorities for permission
- b. To analyze the data collected and identify design goals
- c. To script the procedure and rehearse for observations

Ans: To analyze the data collected and identify design goals

10. How long does the Contextual Inquiry process typically continue?

- a. One to two weeks
- b. One to two hours
- c. One to two months

Ans: One to two hours
